Best Practices for Online Course Delivery

Pacing

Class- and self-paced

Content Delivery

- Primarily asynchronous
- Online lecture/guest lecture recording
- Assess learning with quizzes/ assessments
- May offer occasional (i.e., monthly) live sessions

"Practicing" Content

- Use online tools to demonstrate the execution of content
- Hold synchronous activities in small groups and larger class during live sessions
- Give time for tasks, explain how report out will happen
- Explain how small groups will be formed/disbanded
- Explain breakout features
- Instructor can give prompts and suggestions using private chat features

Student Prep

- Reminders built into course
- Encourage group connection for whole class
- Expectation set to routinely monitor email and check LMS announcements

Assignments General

- Explicit due date, time, and where to submit
- Prerecorded instructions and announcement/email reminders
- Use of technology may improve assignments
- Discussion board for students to ask the instructor questions
- Grading time frame and method explicit and posted visibly

Netiquette

- Built-in/assumed
- Instructor models, students expected to be using basic technology tools
- Include everything that would be in seated class

Technology

- Promote self-regulation with consistent structures
- Provide links and consistency in terms.
- Students may be more comfortable navigating more tech media

Teacher Presence

- Use multiple ways to reinforce teacher presence between synchronous meetings
- Meeting with each student individually or in small groups to build community
- Build in connection with instructor through assignments

Instruction Creativity

- Planned and embedded activities
- Planned synchronous activities
- More opportunities to bring tools in from external/web sources - consider audiences

Exams/Quizzes

beyond the classroom

- Timed assessments with multiple attempts
- Test pools
- Open and close access to exams
- Release results after all test-takers are finished

Self-Management Scaffolding

- Provide content pathways. with some reminders
- Allow students flexibility

Experiencing Content

- Links to multimedia, discussions via flipgrid (for example), guided activities
- Group work self-organized outside of class

Self Awareness

- Synchronous discussion with prompts, anonymous polling, self-check surveys
- Real time processing of triggers, conflicts, and disclosures optimal, but may need to be brought back to synchronous class

Instructor Prep

- Think out when to schedule interactions. assignments, exploration
- When will students most benefit from what kind of synchro engagement?
- Provide self-directed content paths in modules for students to do at their own pace
- Label paths consistently week-to-week and document-to-document

Schedule

- Clear syllabus so students can plan their whole term across classes in advance
- Prerecorded instructions on scheduling regarding workload
- Due dates with flexibility for students with challenging life circumstances related to weekly learning content

- Self-paced within the week
- Perhaps monthly

- synchronous sessions

Social Presence

- Create specific discussion areas for students to have noncourse related conversations
- Use polling
- Small group activities assigned out of class
- Encourage connection through group apps and other social
- Suggest students share questions, ideas, and solutions with one another

Cognitive Presence

 Students show up and are engaged in online synchronous/asynchronous discussions, are prepared, incorporate learning in papers, pose thoughtful questions in synchronous/ asynchronous spaces etc.

Instructor Accessibility

- Virtual office hours
- Best way to contact
- Expectation of availability and response timeframe
- May send survey to students when do they want to meet?

Giving Feedback

- Needs to be scheduled Consider video or
- voicethread feedback If ethics issue, schedule **Zoom meeting**
