

Symptoms of Inner Peace

By Saskia Davis (© 1984)

- A tendency to think and act spontaneously rather than on fears based on past experiences
- An unmistakable ability to enjoy each moment
- A loss of interest in judging other people
- A loss of interest in judging self
- A loss of interest in interpreting the actions of others A loss of interest in conflict
- A loss of the ability to worry (This is a very serious symptom) Frequent, overwhelming episodes of appreciation
- Contented feelings of connectedness with others and nature frequent attacks of smiling
- An increasing tendency to let things happen rather than make them happen
- An increased susceptibility to love extended by others as well as the uncontrollable urge to extend it

Warning: Be on the lookout for symptoms of inner peace. The hearts of a great many have already been exposed, and it is possible that people, everywhere, could come down with it in epidemic proportions. This could pose a serious threat to what has, up to now, been a fairly stable condition in the world. If you have some or all of the above symptoms, please be advised that your condition of inner peace may be too far advanced to be curable. If you are exposed to anyone exhibiting these symptoms, remain exposed at your own risk.
